Introduction to the Practice Test Scoring Guide

This Alternate English Language Proficiency Assessments for California (Alternate ELPAC) Practice Test Scoring Guide offers details about the test questions, student response types, correct responses, and related scoring considerations for the included samples of practice items. The Practice Test gives students, parents and families, teachers, administrators, and others an opportunity to become familiar with the types of test questions on the Alternate ELPAC. When students know what to expect on the test, they will be better prepared to demonstrate their English language proficiency. The Practice Test provides a sample of the question types and grade-level content on the Alternate ELPAC and contains the same number of questions that appear on the operational tests.

The following information is presented for each item:

**Item:** The number that corresponds to the test question as it appears in the Practice Test.

**Key:** Represents the correct answer to the item and includes the score point value for the item and its parts. Items are worth either one or two points. For some technology-enhanced items, there is also a picture of the correct answer marked.

**Task Type:** Each task type is an activity that was designed to gather targeted evidence of a student’s English language proficiency (e.g., “Communicate About Familiar Topics”). A task type is a set with a story or passage and two to four items. Each set is about a topic, such as taking a field trip or going to an event at school.

**Connector:** The Alternate ELPAC is designed to align with the California 2012 English Language Development (ELD) Standards via the ELD Connectors, which reduce the depth, breadth, and complexity of the standards, as appropriate for students with the most significant cognitive disabilities. The connectors represent the highest level of expected performance in English language proficiency at a given grade or grade span.

**Linguistic Complexity Level (LCL):** There are three linguistic complexity levels on the Alternate ELPAC: low, medium, and high. Each of these describes the English language skills expected of the student at the given level.
