Introduction to the Practice Test Scoring Guide

This English Language Proficiency Assessments for California (ELPAC) Practice Test Scoring Guide offers details about the items, student response types, correct responses, and related scoring considerations for the included samples of practice items. The Practice Test gives students, parents and families, teachers, administrators, and others an opportunity to become familiar with the types of test questions included on the ELPAC. When students know what to expect on the test, they will be better prepared to demonstrate their English language proficiency. The Practice Test includes examples of all of the types of questions that may appear in the actual assessment and includes the full number of questions that appear on the assessment. As with the operational test, there are no duplicate questions across grades/grade spans on the Practice Test. The Practice Test items cover a selection of items from performance expectations in grades kindergarten through grade twelve (K–12).

This scoring guide should be used alongside the online Practice Tests, which can be accessed at http://elpac.org/resources/online-practice-and-training-test/. The following information is presented for each item:

**Item:** The item number in the table corresponds to the sequence number of the item as it appears in the Practice Test.

**Key:** The expected student response including score point value. Constructed-response items also show an explanation of what is needed to receive a score at each score point (rubric) and a sample response from a student (exemplar).

**Task Type and Topic:** Each task type is an activity that was designed to gather targeted evidence of a student’s language proficiency (e.g., “Listen to a Short Exchange”). A task type may include a single item or a set of items. Each item or set of items is about a topic, such as a favorite celebration, a math assignment, or evaporation.

**Primary Alignment:** The items are primarily aligned with the 2012 English Language Development (ELD) Standards; many items (especially Speaking and Writing items) also have secondary alignment to additional standards, but the secondary alignments are not listed in the Practice Test Scoring Guide metadata.

**Targeted Performance Level Descriptor (PLD):** The Summative ELPAC General PLDs (2019) describe the English language proficiency of a typical student at each of the four performance levels based on the expectations of the 2012 ELD Standards. This document provides each item’s targeted PLD(s), which are the PLDs at which the item is designed to gather evidence. An item may target evidence at a single PLD or across a span of PLDs. Speaking and Writing items often target the full span of PLDs because the scoring rubrics cover the full range of English language proficiency.

Each item has a metadata table as shown. Metadata contains specific information on the alignment of the item to the ELD Standards. The item number in the table corresponds to the sequence number of the item as it appears in the Practice Test.
