Subject: ELPAC Resolved -- Known Issue for iPad Users: Computer-based Summative ELPAC Audio File in the Grades 3-5 Speaking Test

Notification of Issue Resolution

Dear LEA ELPAC coordinator:

Beginning with this 2019–2020 administration, the Summative English Language Proficiency Assessments for California (ELPAC) is delivered by means of a computer-based test delivery platform.

Students being administered the grades three through five Speaking domain, forms 1–6, on **iPads** might have had audio for an item that was incorrect or missing. This known issue was identified on February 4, 2020 and resolved on February 7, 2020.

This issue has been resolved. Students taking the grades three through five Speaking domain using iPads will hear the correct corresponding audio file. For more information and updates, view the [ELPAC Known Issues Log](#) web page on ELPAC.org.

Any questions about the administration of the Summative ELPAC can be directed to the California Technical Assistance Center (CalTAC), by phone at 800-955-2954 or by email at caltac@ets.org.

Sincerely,

California Technical Assistance Center
Educational Testing Service
